ODM ONE-STOP SERVICES

Our Service Process

01

Industrial design

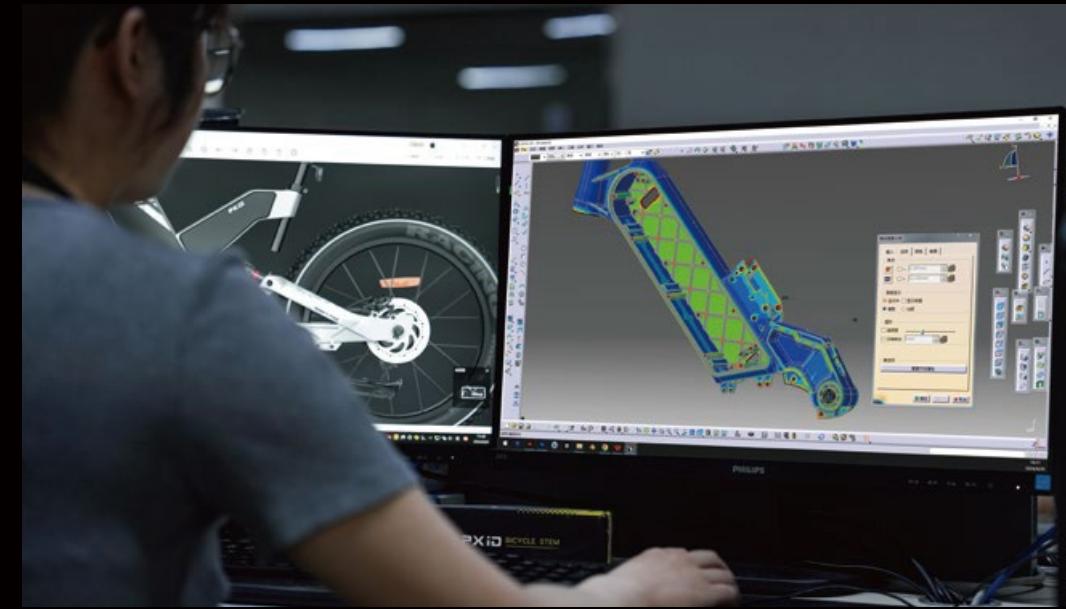

We can interpret your ideas through hand-drawing and 3D rendering, intuitively and accurately.

02

Mechanical design

We turn ID design into components while fully take into considerations for factors such as cost, material selecting, processing , and maintain service.

03

Prototype production

We build a real, ride-able prototype to verify every mechanical structure and component performance to prepare for mass production.

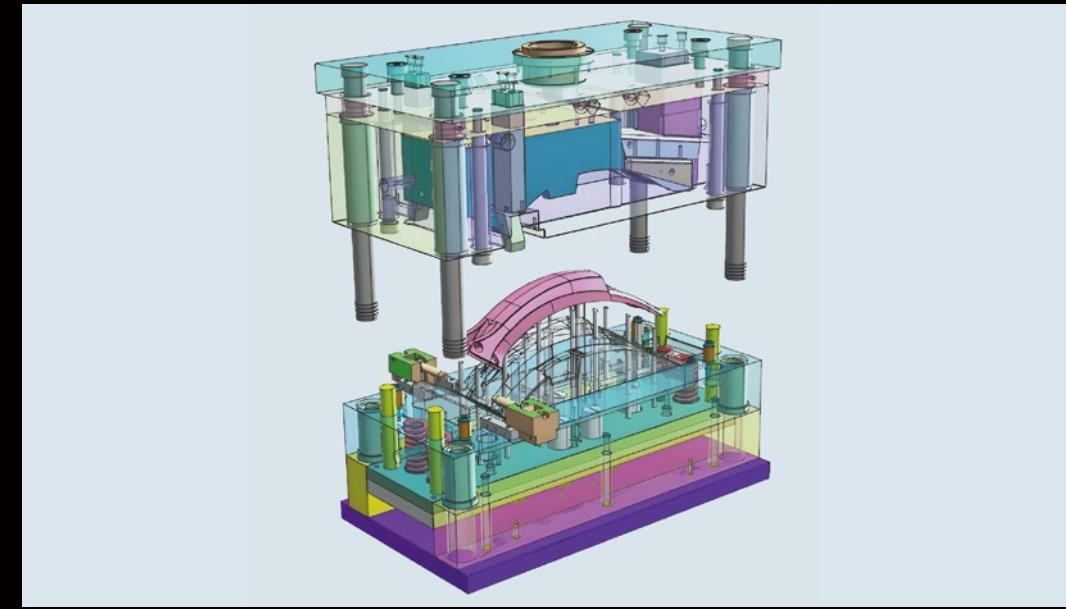

04

Tooling design

After prototype verification, our team will be

ready for tooling design.

PXID is capable of independent tooling design, manufacturing and injection.

05

Tooling manufacturing

We have a lineup of equipment such as CNC EDM machines, injection machines, low-speed wire cutting machines, etc.

06

Frame manufacturing

We are capable of undertaking the whole frame development process such as parts cutting, welding, heat treatment, painting etc.

07

Testing laboratory

We carry out over 20 performance tests including road tests etc for the first batch of mass production, which exceed industry standards.

08

Mass production

PXID have three assembly lines to meet your various production needs.

ODM ONE-STOP SERVICES

WHAT DO WE HAVE ?

25,000 m²

Production Area

100

Technical Team

40

R&D Team

11 years

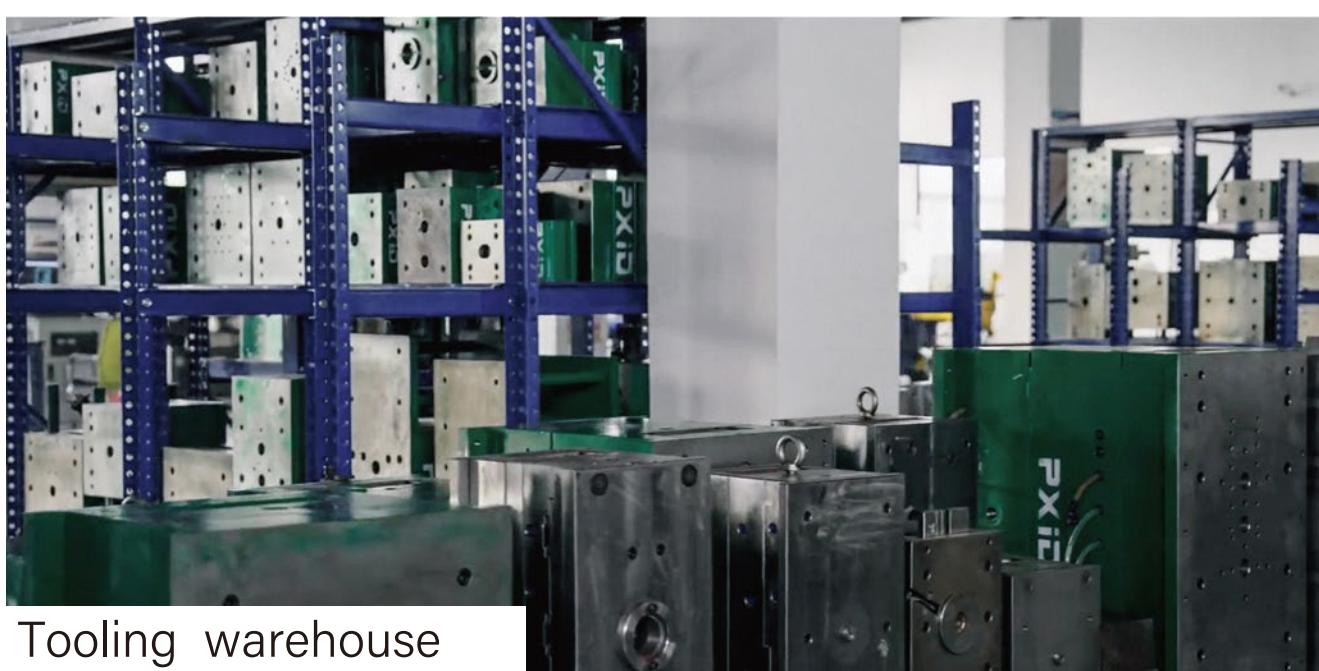

Industry Experience

Tooling manufacturing workshop

CNC processing workshop

Tooling warehouse

EDM tooling processing workshop

Injection tooling processing workshop

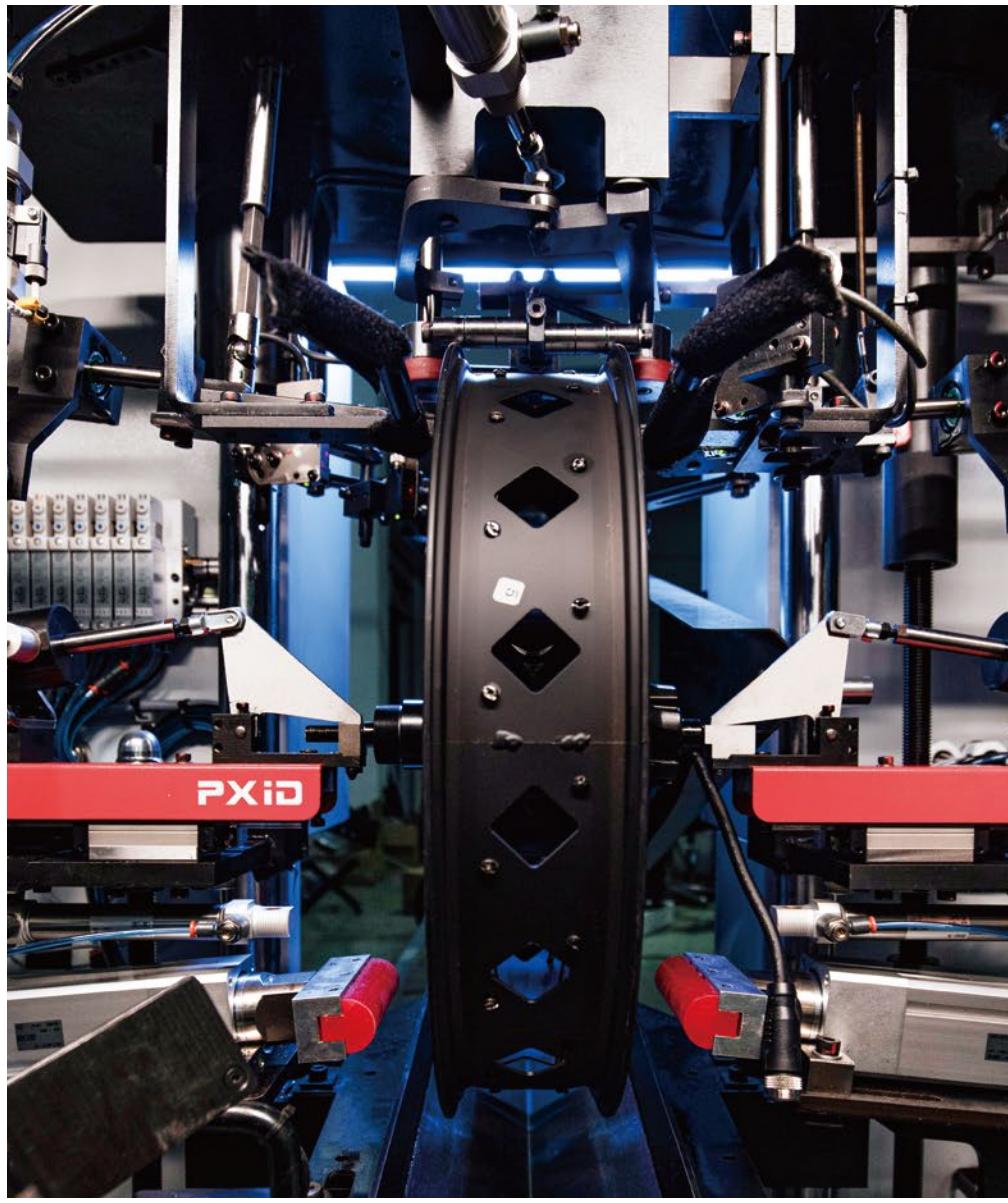

CNC frame processing line

T4 T6 Frame heat treatment line

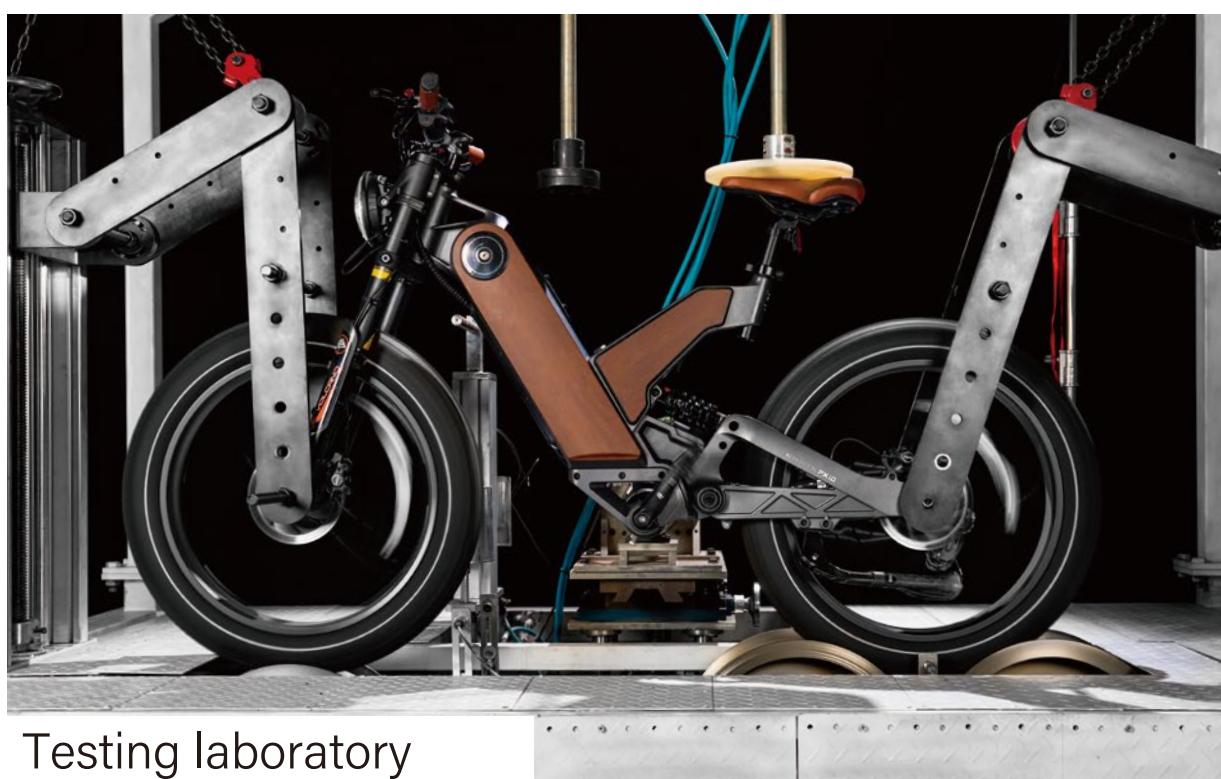

Frame painting line

 Spoked wheel weaving machines

Assembly line

Testing laboratory
